Summary

GTM engineer with four years in enterprise outbound. I choose the accounts, find the moment, write the message, and build the systems that make it repeatable. For more than three years I was the only person generating outbound leads for enterprise sales at MapmyIndia, and I moved that work from manual outreach to automated, AI-assisted systems.

Experience

MapmyIndia Lead Generation Executive — Jul 2022 – present

- Joined as Inside Sales Trainee on inbound; moved to outbound within six months and became sole owner of enterprise outbound for the sales team.
- Ran industry programmes into banks, NBFCs, fintech, gaming, logistics, retail and real estate, each paired with one problem and timed to a reason to act (regulation, a traffic peak, a launch).
- Worked with the Chief Business Officer on which industries and use cases to pursue; wrote the positioning and copy after sign-off.
- Tracked every outbound opportunity in the CRM through pre-sale, proposal and negotiation, and handed qualified accounts to sales and pre-sales.
- Built the outbound playbook (research, buying-committee mapping, ICP qualification, sequences, daily tracking); interviewed and trained the hires who now run it.
- Now owns outbound for the new indoor navigation offering: account database, ICP, buyer roles and account-specific decks.

Clospect Founder — Jan 2026 – present

- GTM systems practice: sending infrastructure, AI workflows and campaign execution for B2B SaaS and recruitment companies.
- Ran outbound end to end for a recruitment client, from ICP and sending infrastructure to campaign execution.
- Built a hiring-signal platform that reads LinkedIn job activity and drafts account-level openers.

Education

New Delhi Institution of Management BBA — 2019 – 2022

Built

Klaroh. Client reporting for cold-email agencies. Next.js, Supabase, Instantly API. Private beta.

GTM Validation Tool. Lead import, AI ICP scoring and email verification on a resumable Postgres job queue.

Outbound workflows. n8n systems for hiring signals, staged qualification and controlled sending.

Skills

Prospecting

ICP definition, buying-committee mapping, signal-led targeting, Apollo, Sales Navigator, Lusha

Sending

Smartlead, Instantly, secondary domains, SPF, DKIM, DMARC, warm-up

Automation and AI

n8n (self-hosted), Apify, Clearout, Gemini, ChatGPT, Claude, Claude Code, webhooks and APIs

Build

Next.js, TypeScript, Supabase, PostgreSQL, Vercel

Data and CRM

CRM opportunity tracking, HubSpot, Airtable, Google Sheets
